ELSEVIER

Journal of Molecular Liquids 71 (1997) 269–270

journal of MOLECULAR LIQUIDS

Volume contents

Vol. 71, No. 1 **FEBRUARY 1997**

Publisher's note v

The mean electrostatic potential difference between liquid water and vacuum by MD simulation
R.R. Gabdoulline, C. Zheng and G. Vanderkooi (DeKalb, IL, USA) 1

Nonlinear dielectric studies of intermolecular interactions and structure of 4-heptyl-4-cyano-biphenyl in benzene
J. Małecki and J. Nowak (Poznań, Poland) 11

Vibrational dephasing in liquid carbonyl sulfide: comparison between molecular dynamics of rigid and flexible molecular models
M.C.C. Ribeiro and P.S. Santos (São Paulo, Brazil) 25

Viscosity and acoustic behaviour of carbonato pentamine cobalt(III) nitrate in water and glycerol–water mixed solvent system
P.K. Mishra and V. Chakravortty (Orissa, India) 39

Excited state proton transfer of β-cyclodextrin encapsulated carbazole in the presence of urea
S. Kundu and N. Chattopadhyay (Calcutta, India) 49

Vibrational relaxation of diphenylacetylene in liquid solutions
H. Abramczyk, M. Kołodziejski and G. Waliszewska (Wróblewskiego, Poland) 61

Dielectric investigation on a nuclear extractant-acetylacetone (HAA) in nonpolar solvents
S. Acharya, S.K. Dash, J.N. Mohanty and B.B. Swain (Orissa, India) 73

On the solution of the Fokker–Planck equation for dipolar particles in a viscoelastic fluid
Y.L. Raikher and V.V. Rusakov (Perm, Russia) 81

Rigorous treatment of linear hydrogen bonded alcohol chains
M. Szwarc (Los Angeles, CA, USA) 91

Vol. 71, Nos. 2/3 **APRIL 1997**

Special Issue

PROCEEDINGS OF THE XXV WINTER MEETING ON STATISTICAL PHYSICS, CUERNAVACA, MEXICO, 9–12 JANUARY, 1996

Preface vii

Derivation of the quantum Langevin equation
N.G. Van Kampen (Utrecht, The Netherlands) 97

The structure of vitreous B_2O_3 obtained from a thermostatistical model of agglomeration
M. Micoulaut (Paris, France) 107

Propagation of optical solitons in a nematic waveguide
R.F. Rodríguez and J.A. Reyes (Mexico, Mexico) 115
Layered spreading microdroplets
S. Villette, M.P. Valignat, A.M. Cazabat (Paris, France) 129
Influence of transport on the adsorption of colloidal suspensions
I. Pagonabarraga and J.M. Rubí (Barcelona, Spain) 137
Selfaggregation of glyco-lipids in water: vesicle to micelle transition
L. Cantù, M. Corti and E. Del Favero (Milan, Italy) 151
The role of surface spinodals in nucleation and wetting phenomena
J.O. Indekeu (Leuven, Belgium) and D. Bonn (Paris, France) 163
A model of glass transition in binary and ternary glasses
R. Kerner and M. Micoulaut (Paris, France) 175
The quantum random walk within the Schrödinger-Langevin approach
M.O. Cáceres and A.K. Chattah (S.C. de Bariloche, Argentina) 187
Thermal shape fluctuations of fluid-phase phospholipid-bilayer membranes and vesicles
M. Wortis, M. Jarić (Burnaby, B.C., Canada) and U. Seifert (Teltow-Seehof, Germany) 195
Living poly(α-methylstyrene) near the polymerization line: Shear viscosity in tetrahydrofuran
J. Ruiz-Garcia (San Luis Potosí, México) and S.C. Greer (College Park, MD, USA) 209
Computer simulations of fracture in disordered viscoelastic systems
K. Kaski and P. Heino (Tampere, Finland) 225
Fluctuations in diffusive lattice gas automata
A. Suárez (Brussels, Belgium) 235
Brownian motion in asymmetric two-dimensional colloidal mixtures
M. Chávez-Páez, J.L. Arauz-Lara and M. Medina-Noyola (San Luis Potosí, Mexico) 245
Two-dimensional turbulence in pure-electron plasma: a nonextensive thermostatistical description
C. Anteneodo and C. Tsallis (Rio de Janeiro, Brazil) 255

Volume contents 269
